Do not go where
the path may lead,
go instead where
there is no path and
leave a trail.

-Ralph Waldo Emerson

Welcome to Avantika

It was Bob Dylan who said, “People seldom do what they believe in. They do what is convenient, then repent”. To live a life full of bygone opportunities is a life full of misery. To seek comfort in convenience is a crime.

By stepping into Avantika, you have entered a vibrant, cosmopolitan campus comprising an eclectic mix of minds from all over the country and beyond; of all political persuasions and socio-economic statuses. You are now an integral part of a residential community of learners with a common goal – that of intellectual transformation. The world as it stands today is replete with challenges – from the contentious presidential contest in America to the refugee crisis in Europe; to climate-related famine in Africa and the drought in California.

It’s easy to be overwhelmed by the intensity – as one should be – but let’s not forget, you are a part of the solution. At Avantika, you have the freedom to pursue reason, facts, logic, and empathize with human nature. You will be armed to become the capstone of education by being a conscientious explorer, creator, and thinker.

▀ **Indeed, the world is now your oyster.**

**Welcome to Avantika.
Welcome to a world of opportunities!**

Pedagogies

Experiential Learning

Experiential learning is a process through which students develop knowledge, skills, and values from direct experiences outside a traditional academic setting.

Experiential learning follows a process of ACT (Concrete experience), APPLY (Reflexive observation), REFLECT (Abstract Conceptualisation), and CONCEPTUALIZE (Practical Application).

Activity based Learning

Activity based learning (ABL) is a subset of Experiential learning where students learn at their own pace through teacher-facilitated exercises.

The core premise of ABL is based on doing some hands-on experiments and activities. The idea of ABL is rooted in the common notion that students are active learners rather than passive recipients of information. If they are provided the opportunity to explore on their own along with an optimum learning environment then the learning becomes joyful and long-lasting.

Blended Learning

Blended learning is an education program (formal or informal) that combines online digital media with traditional classroom methods. It requires the physical presence of both teacher and student, with some element of student control over time, place, path, or pace.

While students still attend “brick-and-mortar” schools with a teacher present, face-to-face classroom practices are combined with computer-mediated activities regarding content and delivery. Blended learning is also used in professional development and training settings.

“Learning
through
reflection
on doing”

Flipped Classroom

The Flipped Classroom is a pedagogical model in which the typical lecture and homework elements of a course are reversed. Short video lectures are viewed by students at home before the class session, while in-class time is devoted to exercises, projects, or discussions. The video lecture is often seen as the key ingredient in the flipped approach, such lectures being either created by the instructor and posted online or selected from an online repository.

While a pre-recorded lecture could certainly be a podcast or other audio format, the ease with which video can be accessed and viewed today has made it so ubiquitous that the flipped model has come to be identified with it.

Storytelling

Storytelling is an activity that can transfer emotions and feelings and also can boost thinking capacity. It involves the conveying of events in words, sound and/or images, often by improvisation or embellishment. Stories or narratives have been shared in every culture as a means of entertainment, education, cultural preservation, and instilling moral values. Storytelling is an art that has mental, social and educational benefits for students.

Project based Learning

Project Based Learning allows students to gain knowledge and skills by working for an extended period to investigate and respond to an engaging and complex question, problem, or challenge.

5 keys to rigorous problem solving

- 1** Real world connection - authentic problem
- 2** Effective learning - through the project
- 3** Structured collaboration
- 4** Student-driven - Teachers become facilitators, and students take control. As facilitators, teachers need to ask good questions and redirect the students if necessary.
- 5** Multifaceted assessment – This includes in-between assessment and formative assessments. Students should also be able to assess themselves.

Scenario based Learning / Contextual Learning

Scenario based learning (SBL) uses interactive scenarios to support active learning strategies such as problem-based or case-based learning. It normally involves students working their way through a storyline, usually based around an ill-structured or complex problem, which they are required to solve.

Game & Game Design

Game design is the art of applying design and aesthetics to create a game to facilitate interaction between players for playful, healthful, educational, or simulation purposes. Game design can be applied both to games and to other interactions, particularly virtual ones.

Play

Learning through play is a term used in education and psychology to describe how a student can learn to make sense of the world around them. Through play, students can develop social and cognitive skills, mature emotionally, and gain the self-confidence required to engage in new experiences and environments.

Key ways that young students learn include playing, being with other people, being active, exploring new experiences, talking to themselves, communication with others, meeting physical and mental challenges, being shown how to do new things, practicing and repeating skills and having fun.

- ▶ Students have freedom of speech to express their ideas, and may give alternate opinions to classroom discussions.
- ▶ There will be no discrimination based on race, color, ethnicity, religion, age, caste, creed, ancestry, sex, gender, disability, civil union status, or national origin.

Interesting facts on UJAIN

You may be acquainted with Ujjain as a pilgrimage town, but it has so much more to offer to anyone who visits, cutting across all age groups. Indeed, as you step in Ujjain the spiritual vibe is palpable in the air. Going beyond the obvious, this is a city that is a balanced blend of the old and new with stunning ancient architectural monuments and glitzy shopping centers. Quite literally the 'heart of India', Ujjain boasts of an eclectic mix of cultures when it comes to its cuisine. The food here is a lip-smacking blend of Rajasthani, Gujarati, and Malwa flavors in both, savory and sweet versions. Being listed on the Smart Cities Mission, Ujjain is undergoing a massive facelift with improved infrastructural facilities and is en route to becoming an amazing city to live in with fabulous growth potential.

Some popular tourist attractions in the city include:

Shree Mahakaleshwar Temple

It is a well-known pilgrimage destination dedicated to Lord Shiva. Mahakumbh – the world's largest religious gathering is held here every 12 years. The walls of this temple are decorated with sculptures, motifs, and inscriptions.

Chintaman Ganesh Temple

Chintaman means relief from stress – this is a popular avatar of Lord Ganesha - God of auspicious beginnings, and the temple is dedicated to this deity.

HarSiddhi Temple

Built in the Maratha period, the temple has a special place in the city's history.

Vedh Shala

Also known as Jantar Mantar, it was India's first observatory constructed in 1725, comprising 13 architectural and astronomy instruments.

UNIVERSITY

The Lotus symbolizes potential and in its fully blossomed form represents enlightenment and awareness. The flower is deeply rooted in Indian culture, particularly associated with Saraswati – the Goddess of Wisdom.

The transdisciplinary approach is represented through the confluence of sections, implying an immersive learning experience. The transition of colors represents evolution of an individual at Avantika University.

The identity reflects transformation, and it is knowledge (Vidya) that drives the transition, and ultimately leading to accomplishment (Siddhi).

Accomplishment Adorns Knowledge

All knowledge that the world has ever received comes from the mind; the infinite library of the universe is in our own mind.
